# Country Brief: Brazos

*Large, balanced economy.*

---

**Phase 1 — Ricardo** (one factor: labor)

Labor force: **150** workers

Productivity: cloth = 2.0/worker, wine = 2.0/worker

Your own opportunity cost: 1 wine costs **1.00** cloth foregone.

*What can you make more cheaply than your trading partners?*

**Phase 2 — Heckscher–Ohlin** (two factors: labor + capital)

Labor: **150** Capital: **150** K/L ratio: **1.00**

| Good | Your TFP | Labor share | Capital share |
|---|---|---|---|
| cloth | 1.0 | 0.70 | 0.30 |
| wine | 1.0 | 0.55 | 0.45 |
| machinery | 1.0 | 0.25 | 0.75 |

*Factor intensities are the same for everyone: cloth is labor-intensive, machinery is capital-intensive, wine is in between.*

**Later in the game**

- **Phase 3+ (MNCs):** firms that start on your soil — Wine-C (F6, wine), Mach-C (F9, machinery).
- **Phase 5 (money):** you run your own currency — choose a regime and live with the trilemma.
- **Phase 6 (debt):** you may borrow against future consumption — and you may default.
- **Phase 7 (institutions):** join the WTO, bind your tariffs, and decide whether to back the system.

# Country Brief: Bosque

*Small textiles powerhouse.*

---

**Phase 1 — Ricardo** (one factor: labor)

Labor force: **60** workers

Productivity: cloth = 4.0/worker, wine = 1.0/worker

Your own opportunity cost: 1 wine costs **4.00** cloth foregone.

*What can you make more cheaply than your trading partners?*

**Phase 2 — Heckscher–Ohlin** (two factors: labor + capital)

Labor: **60** Capital: **25** K/L ratio: **0.42**

| Good | Your TFP | Labor share | Capital share |
|---|---|---|---|
| cloth | 1.2 | 0.70 | 0.30 |
| wine | 0.8 | 0.55 | 0.45 |
| machinery | 0.7 | 0.25 | 0.75 |

*Factor intensities are the same for everyone: cloth is labor-intensive, machinery is capital-intensive, wine is in between.*

**Later in the game**

- **Phase 3+ (MNCs):** firms that start on your soil — Cloth-A (F1, cloth), Wine-D (F12, wine).
- **Phase 5 (money):** you run your own currency — choose a regime and live with the trilemma.
- **Phase 6 (debt):** you may borrow against future consumption — and you may default.
- **Phase 7 (institutions):** join the WTO, bind your tariffs, and decide whether to back the system.

# Country Brief: Llano

*Medium economy with strong wine sector.*

---

### Phase 1 — Ricardo (one factor: labor)

Labor force: **100** workers

Productivity: cloth = 1.0/worker, wine = 3.0/worker

Your own opportunity cost: 1 wine costs **0.33** cloth foregone.

*What can you make more cheaply than your trading partners?*

### Phase 2 — Heckscher–Ohlin (two factors: labor + capital)

Labor: **100** Capital: **80** K/L ratio: **0.80**

| Good | Your TFP | Labor share | Capital share |
|---|---|---|---|
| cloth | 0.8 | 0.70 | 0.30 |
| wine | 1.3 | 0.55 | 0.45 |
| machinery | 0.9 | 0.25 | 0.75 |

*Factor intensities are the same for everyone: cloth is labor-intensive, machinery is capital-intensive, wine is in between.*

### Later in the game

- **Phase 3+ (MNCs):** firms that start on your soil — Cloth-B (F2, cloth), Wine-A (F4, wine).
- **Phase 5 (money):** you run your own currency — choose a regime and live with the trilemma.
- **Phase 6 (debt):** you may borrow against future consumption — and you may default.
- **Phase 7 (institutions):** join the WTO, bind your tariffs, and decide whether to back the system.

# Country Brief: Trinity

*Large economy, somewhat diversified.*

---

### Phase 1 — Ricardo (one factor: labor)

Labor force: **120** workers

Productivity: cloth = 3.0/worker, wine = 1.5/worker

Your own opportunity cost: 1 wine costs **2.00** cloth foregone.

*What can you make more cheaply than your trading partners?*

### Phase 2 — Heckscher–Ohlin (two factors: labor + capital)

Labor: **120** Capital: **200** K/L ratio: **1.67**

| Good | Your TFP | Labor share | Capital share |
|---|---|---|---|
| cloth | 1.0 | 0.70 | 0.30 |
| wine | 0.9 | 0.55 | 0.45 |
| machinery | 1.2 | 0.25 | 0.75 |

*Factor intensities are the same for everyone: cloth is labor-intensive, machinery is capital-intensive, wine is in between.*

### Later in the game

- **Phase 3+ (MNCs):** firms that start on your soil — Mach-A (F7, machinery), Mach-D (F10, machinery), Cloth-D (F11, cloth).
- **Phase 5 (money):** you run your own currency — choose a regime and live with the trilemma.
- **Phase 6 (debt):** you may borrow against future consumption — and you may default.
- **Phase 7 (institutions):** join the WTO, bind your tariffs, and decide whether to back the system.

# Country Brief: Pecos

*Tiny but efficient.*

---

**Phase 1 — Ricardo** (one factor: labor)

Labor force: **50** workers

Productivity: cloth = 3.5/worker, wine = 3.5/worker

Your own opportunity cost: 1 wine costs **1.00** cloth foregone.

*What can you make more cheaply than your trading partners?*

**Phase 2 — Heckscher–Ohlin** (two factors: labor + capital)

Labor: **50** Capital: **120** K/L ratio: **2.40**

| Good | Your TFP | Labor share | Capital share |
|---|---|---|---|
| cloth | 1.0 | 0.70 | 0.30 |
| wine | 1.0 | 0.55 | 0.45 |
| machinery | 1.1 | 0.25 | 0.75 |

*Factor intensities are the same for everyone: cloth is labor-intensive, machinery is capital-intensive, wine is in between.*

**Later in the game**

- **Phase 3+ (MNCs):** firms that start on your soil — Mach-B (F8, machinery).
- **Phase 5 (money):** you run your own currency — choose a regime and live with the trilemma.
- **Phase 6 (debt):** you may borrow against future consumption — and you may default.
- **Phase 7 (institutions):** join the WTO, bind your tariffs, and decide whether to back the system.

# Country Brief: Sabine

*Medium economy, low productivity.*

---

### Phase 1 — Ricardo (one factor: labor)

Labor force: **100** workers

Productivity: cloth = 1.0/worker, wine = 1.5/worker

Your own opportunity cost: 1 wine costs **0.67** cloth foregone.

*What can you make more cheaply than your trading partners?*

### Phase 2 — Heckscher–Ohlin (two factors: labor + capital)

Labor: **100** Capital: **35** K/L ratio: **0.35**

| Good | Your TFP | Labor share | Capital share |
|---|---|---|---|
| cloth | 1.1 | 0.70 | 0.30 |
| wine | 1.0 | 0.55 | 0.45 |
| machinery | 0.6 | 0.25 | 0.75 |

*Factor intensities are the same for everyone: cloth is labor-intensive, machinery is capital-intensive, wine is in between.*

### Later in the game

- **Phase 3+ (MNCs):** firms that start on your soil — Cloth-C (F3, cloth), Wine-B (F5, wine), Mach-E (F13, machinery).
- **Phase 5 (money):** you run your own currency — choose a regime and live with the trilemma.
- **Phase 6 (debt):** you may borrow against future consumption — and you may default.
- **Phase 7 (institutions):** join the WTO, bind your tariffs, and decide whether to back the system.
