

MNC Decision Form

(Phase 3+)

You own this firm — alone or with a partner — even though it sits in another country. Each round: choose how much to produce (*scale*), whether to *relocate* to a new host, and (Phase 4+) whether to pay the fixed cost to *export*. It can move anywhere except your own country. Productivity tiers: HIGH 1.3, MED 1.0, LOW 0.7.

ROUND _____ — FIRM F1: Cloth-A		Owner(s): _____
Industry: cloth Productivity: 1.3 Starting host: Bosque		
Price per unit sold: 1.00 Unit cost: 0.60 Max scale: 40 Export fixed cost: 8		
SCALE (0–40): _____		RELOCATE TO: _____ <i>(blank = stay)</i>
<i>Relocate anywhere except your own country — no re-shoring.</i>		
EXPORT this round? ☐ Yes ☐ No		<i>(Phase 4+; pays the fixed cost)</i>

Hand in the slip above; keep this half.

How the numbers work — a worked example at scale 23

Scale 23 is an illustration, not a recommendation. Redo the table at the scale you actually choose.

	Stay home	Export (premium 25%)
Units made: scale $\times$ productivity	$23 \times 1.3 = 29.9$	29.9
Revenue: units $\times$ price	$29.9 \times 1.00 = 29.90$	$29.90 \times 1.25 = 37.38$
Production cost: scale $\times$ unit cost	$23 \times 0.60 = 13.80$	13.80
Export fixed cost	—	8.00
Profit	16.10	15.58

Verdict: at scale 23, exporting **loses 0.52**: the extra revenue (7.48) does not cover the fixed cost (8.00). Stay home.

- **The rule:** export only if units $\times$ price $\times$ premium $>$ the fixed export cost. The fixed cost is the same whether you ship 5 units or 50, so exporting needs volume.
- **The premium** is on the board each round. 25% is the most it can be; tariffs other countries put on your good from your host shrink it.
- **Your local sales** — 20% of your units — count toward your *host's* welfare, export or not; the rest sells on world markets. **Your profit** counts every unit, and it is yours alone.
- **Your host's MNC tax** takes its % of your revenue (premium included), so a lower-tax host keeps more of your profit — but moving means producing nothing that round. From Phase 5 your profit is worth what your host's currency is worth.

MNC Decision Form

(Phase 3+)

You own this firm — alone or with a partner — even though it sits in another country. Each round: choose how much to produce (*scale*), whether to *relocate* to a new host, and (Phase 4+) whether to pay the fixed cost to *export*. It can move anywhere except your own country. Productivity tiers: HIGH 1.3, MED 1.0, LOW 0.7.

ROUND _____ — FIRM F3: Cloth-C	Owner(s): _____
Industry: cloth Productivity: 0.7 Starting host: Sabine	
Price per unit sold: 1.00 Unit cost: 0.60 Max scale: 40 Export fixed cost: 8	
SCALE (0–40): _____ RELOCATE TO: _____ <i>(blank = stay)</i>	
<i>Relocate anywhere except your own country — no re-shoring.</i>	
EXPORT this round? ☐ Yes ☐ No	
<i>(Phase 4+; pays the fixed cost)</i>
