ROUND _____ — Sabine (Phase 2+: trade form)

Labor: **100** — Capital: **35**

Production — Labor (must sum to **100**):

- Cloth: _____ workers
- Wine: _____ workers
- Machinery: _____ workers

Production — Capital (must sum to **35**):

- Cloth: _____ capital
- Wine: _____ capital
- Machinery: _____ capital

A good needs both *labor and capital to be produced.*

Tariffs (0–100%, on imports, per partner per good):

- from **Bosque**: cloth: _____% wine: _____% machinery: _____%
- from **Llano**: cloth: _____% wine: _____% machinery: _____%
- from **Trinity**: cloth: _____% wine: _____% machinery: _____%

Compensation — buy off the groups trade displaced, instead of taxing imports:

- This round we compensate: _____% of our consumption *(0–25%)*
- Side payment to another country: _____ units of _____ to _____.

Compensating 10% buys about +2.5 approval a round and costs 2% of your welfare — roughly what a 20% tariff buys, for less, and your trade stays open. A side payment does the same for whoever receives it (only the net counts) — but if you pay each other, it is a trade, tariffs and all.

MNC tax (Phase 3+) — on foreign-owned firms in Sabine: _____% of their revenue *(0–50%)*

Blank keeps last round's rate. What you collect adds to your welfare. Set it too high and the owners can move their firm out, taking its output with it.

Trade offers (negotiate first, then commit):

- We give _____ units of _____ to _____;
  in return: _____ units of _____.
- We give _____ units of _____ to _____;
  in return: _____ units of _____.
- We give _____ units of _____ to _____;
  in return: _____ units of _____.

(Use the back of the sheet for more offers.)

ROUND _____ — Bosque (Phase 2+: trade form)

Labor: **60** — Capital: **25**

Production — Labor (must sum to **60**):

- Cloth: _____ workers
- Wine: _____ workers
- Machinery: _____ workers

Production — Capital (must sum to **25**):

- Cloth: _____ capital
- Wine: _____ capital
- Machinery: _____ capital

A good needs both *labor and capital to be produced.*

Tariffs (0–100%, on imports, per partner per good):

- from **Sabine**: cloth: _____% wine: _____% machinery: _____%
- from **Llano**: cloth: _____% wine: _____% machinery: _____%
